I would say however the Region can provide information to the Board so that the answers to questions like these are readily apparent would be good. Hopefully they can discuss today what they will need. Your alternatives look like worthwhile options to discuss.

Doug Ammon

Stuart, Thanks for pointing out important issues...

Stuart,

Thanks for pointing out important issues and questions for the Board to consider. Given OSRTI's involvement and approval of the SFS, here are proposed alternatives:

- Posting the information from the local governments as background for the Board.
- Request that the Region provide more detail to the Board about the reasonable anticipated land use.
- Request that the Region provide more information to the Board, taken from the SFS, on the ingrowth. I'm not sure that the maximum level was calculated but I believe they could easily extrapolate from the ingrowth model used in the report.
- Request that the Region provide more information about the partial excavation alternative that was evaluated in the first FS.
- Request that the Region provide more information to the Board taken from the SFS, that compares the RI data with the historical NRC information. This was a major focus of the SFS.
